TASKS

WEB DEVELOPMENT INTERNSHIP TASKS

This internship program focuses on providing you with hands-on experience in web development. You will learn the latest technologies and frameworks to build modern and responsive websites.

TASK 1

MAKE A SURVEY FORM

Create a multi-page survey and make sure that the states save between pages. Eventually, make sure the survey can submit the data somewhere, whether via email or stored in a database.

TASK 2

INTEGRATE CAPTCHA WITH AN EXISTING WEBSITE

This is an introduction to using third-party scripts on an existing website, and it's an important talent to have. A lot of websites today use multiple third-party apps. This is also great practice in following a developer's documentation.

Take a look at different types of CAPTCHA services and list the pros and cons of each.

TASK 3

CREATE A WORDPRESS SITE

A lot of people learn more about how to design a project through WordPress. And WordPress knowledge itself is a hot commodity. Practice by creating your own WordPress site using the directions on WordPress.com. Pay attention to themes, plug-ins, and the ability to customize your CSS
